this publication a joint initiative of the world commission on the ethics of scientific knowledge and technology comes and the unesco division of ethics of science and technology contains essays written by eight leading international experts in this relatively new interdisciplinary area of applied ethics these papers consider the moral dimensions of environmental management issues and explores proposals for effective international policy making to promote environmental objectives

this well constructed and highly original sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections the book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the earth to make ethics an everyday activity not something left to experts and specialists context based activities are presented in almost every chapter while it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action it walks on the ground and isn't afraid to get a little dirty or to seek joy in earthly relationships and it ultimately breaks with much western academic tradition by framing

ethics in a storied world thus making room to move beyond euro american perspectives in environmental issues this work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices

case studies in environmental ethics is a collection of more than 40 case studies covering diverse topics such as genetic engineering aesthetics pollution animal rights population and resource management it is intended as a supplemental book for college courses primarily in environmental ethics each case presents factual information on a particular topic followed by a discussion of the ethical implications of each topic and several insightful discussion questions the cases are concise yet rich in detail and controversy to provide significant classroom discussion these cases focus on philosophical and policy decisions that students are likely to encounter in their everyday lives in addition the book provides numerous sources and an internet resources section to allow students to research the issues found in the cases

in this clear concise comprehensively revised and up to date introduction to environmental ethics robin attfield guides the student through the key issues and debates in this field in ways that will also be of interest to a wide range of scholars and researchers the book introduces environmental problems and environmental ethics and surveys theories of the sources of the problems attfield also puts forward his own original contribution to the debates advocating biocentric consequentialism among theories of normative ethics and defending objectivism in meta ethics the possibilities of ethical consumerism and investment are discussed and the nature and basis of responsibilities for future generations in such areas as sustainable development are given detailed consideration attfield adopts an inclusive cosmopolitan perspective in discussions of global ethics and citizenship and illustrates his argument with a discussion of global warming mitigation adaptation and global justice the revised edition features a new chapter on climate change new treatments of animal issues ecofeminism environmental aesthetics invasion biology and virtue ethics and new applications of the precautionary principle to fisheries genetic engineering and synthetic biology the glossary and bibliography have been updated to assist understanding of these themes the text uses a range of devices to aid understanding such as summaries of key issues and guides to further reading and relevant websites it has been written particularly with a view to the needs of students taking courses in environmental ethics and will be of interest to students and scholars of philosophy ethics geography religion and environmental studies

this anthology designed for use in undergraduate courses in environmental ethics includes new and classic readings by leading writers in the field full length case studies and many short discussion cases introductions and discussion questions are provided for all the essays with each chapter introduced by a summary of the issues and appropriate philosophic historical and scientific background exploring ethical theory environmental ethics science and the environmental movement earthcare also offers suggestions for students on how to think about ethics and the environment through many worldviews

religions and philosophical perspectives this collection grapples with environmental ethics issues from valuing nature concerns about the atmosphere water land animals and human population as well as the interlocking and often problematic interests of business consumption energy and sustainability this book also features examples of a wide variety of environmentally engaged individuals giving students a way of seeing the connections between the material studied and what they themselves might accomplish

no one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises now more than a decade into the next century no one can ignore it a new environmental ethics the next millennium for life on earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics this book however is not simply a judicious overview instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future as a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for

can aesthetics and ethics be integrated for the good of habitats places and spaces how can the arts widen our perception of nature and deepen environmental ethics should the political meaning of a landscape be defined solely in terms of its economic and ecological values questions like these are explored from the angles of arts environmental ethics ecology religious studies theology art history and philosophy the book prompts discussion about the aesthetic and spiritual dimension in the environmental humanities and it offers transdisciplinary insights into the challenge of sustainability and ongoing changes in society and the environment series studies in religion and the environment studien zur religion und umwelt vol 7

a comprehensive introductory textbook that integrates environmental ethics with social and religious perspectives this cross disciplinary approach helps students understand the depth and breadth of environmental issues in a globally relevant way environmental problems are explained by ecological social ethical and religious dimensions that inspire environmental conservation it underlines the reasons why intrinsic values of nature and those who inhabit it must be taken into consideration when making decisions that affect them this book is also intended for those interested in understanding the environmental debate which is a critical component of environmental management features presents the historical review of the environmental movement introduces ethical reasoning in environmental problems explains environmental ethic approaches and practical implications discusses the role of religions in nature conservation and eco theology includes exercises for reflection in each chapter to stimulate student engagement with environmental issues this great textbook gives readers new insight into caring for the environment it is for undergraduate and graduate students taking courses in

environmental studies geography sociology anthropology and philosophy as well as professionals in environmental management and environmental policy and for those interested in environmental issues and the ethics of nature conservation

as the destructive consequences of environmental problems such as global warming water scarcity and resource and biodiversity destruction have been felt ever more heavily people are becoming more aware of the importance of and their responsibilities towards environmental protection the causes of our problems are anthropogenic the number of people working in what might be termed environmental industries or with environmental responsibilities in their day to day work has mushroomed in many cases however individuals charged with protecting the environment have a set of empirical priorities what is done rather than moral priorities which consider what should be done the need to harmonize environmental knowledge with ethical behaviour and thus achieve behavioural change and the internalization of environmentally ethical values has never been more urgent this book developed as part of an eu programme to diffuse the application of environmental ethics to decision making on pollution control is a response to the need for a restatement of environmental ethics and for a code of behaviour and set of values that can be internalised and adopted to guide the actions by individuals at the sharp end of protecting the environment decision makers and environmental experts executives staff working in municipalities and public government organisations throughout the eu and turkey it is nothing short of an ethical training manual that will guide environmental experts decision makers in making sound judgements and decisions and will act as a bridge between environmental knowledge and environmental behaviour the book will be essential reading for decision makers and experts working in local authorities and governmental organisations with responsibility for environmental protection for both graduate and postgraduate students in environment related disciplines and for vocational education teachers with a focus on the environment

no one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises now more than a decade into the next century no one can ignore it a new environmental ethics the next millennium for life on earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics this book however is not simply a judicious overview instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future as a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for

the concept of milieu in environmental ethics discusses how we can come together to address current environmental problems at the planetary level such as climate change biodiversity loss transborder pollution and desertification the book recognises the

embedded individual sociocultural and environmental contexts that impact our everyday choices it asks in this pluralism of worldviews how can we build common ground to tackle environmental issues what is our individual moral responsibility within the larger collaborative challenge through philosophical reasoning this book pragmatically addresses these questions and builds a framework to support sustainable ways of living at the core of the book it draws on the concept of milieu fūdo inspired by the japanese philosopher watsuji tetsurō which captures how we act within and perceive our surroundings as a web of culturally historically and geographically situated meanings and values it argues that the milieu connects us as individuals with community past and future history and the natural world providing us with common ground for global environmental ethics this book will be an engaging and interesting read for scholars researchers and students in environmental ethics philosophy and sustainability

what is the ethical significance of the environment how shall we dwell on and with the earth and what if anything do we owe to future generations time and the land pursues these questions through each of the four most prominent theories of ethics in the western philosophical tradition utilitarianism distributive justice kantian deontology and virtue ethics for each theory derek parfit s non identity problem serves as a test case parfit showed how some environmental policy decisions might harm no one in the far distant future even if they produce situations all would agree are intrinsically repugnant myers seeks a theory of environmental ethics that not only responds to pressing moral problems in environmental policy but also avoids the paradox of the non identity problem myers concludes that no single theory by itself can accomplish this task a synthesis of ethics is required but virtue must lead the way as virtue is not a utility maximizing theory it avoids the non identity problem at the same time its potential for responding to environmental ethics dilemmas is deep myers concludes that the aim for a worthwhile human life must include the aim to create and sustain the environmental conditions in which the worthwhile human life is possible and supported a virtuous person takes care of the future through aiming at ends which are while achievable in the present also temporally continuous and ongoing even beyond the one s own lifetime and the future which it is virtuous to aim for is the one which brings out one s best qualities in the course of striving for it

whatever its origins eve environmental virtue ethics now appears to be a vital part of the environmental philosophy landscape whether you look to it for an alternative to other theoretical approaches to environmental ethics or as a complement to them there are a number of ways eve clarifies our environmental choices and responsibilities this is an exciting collection that addresses compelling issues not only in eve but in environmental philosophy more broadly in addition to their individual merits these articles collectively demonstrate the value of eve to environmental philosophy and the value of environmental philosophy in helping create sustainable societies and preserve nature recent movement on negotiating a strong successor to the kyoto treaty gives some hope that the world is waking up to the moral imperative to protect the earth but whether people will be willing to ratchet down our economic demands and reshape our economies to reflect this hoped for moral progress remains to be seen previously published in the journal of agricultural and environmental ethics volume 23 1 2 2010

environmental ethics presents and defends a systematic and comprehensive account of the moral relation between human beings and their natural environment and assumes that human behaviour toward the natural world can and is governed by moral norms in contemporary society film has provided a powerful instrument for the moulding of such ethical attitudes through a close examination of the medium environmental ethics and film explores how historical ethical values can be re imagined and re constituted for more contemporary audiences building on an extensive back catalogue of eco film analysis the author focuses on a diverse selection of contemporary films which target audiences ethical sensibilities in very different ways each chapter focuses on at least three close readings of films and documentaries examining a wide range of environmental issues as they are illustrated across contemporary hollywood films this book is an invaluable resource for students and scholars of environmental communication film studies media and cultural studies environmental philosophy and ethics

this volume works to connect issues in environmental ethics with the best work in contemporary normative theory environmental issues challenge contemporary ethical theorists to account for topics that traditional ethical theories do not address to any significant extent this book articulates and evaluates consequentialist responses to that challenge contributors provide a thorough and well rounded analysis of the benefits and limitations of the consequentialist perspective in addressing environmental issues in particular the contributors use consequentialist theory to address central questions in environmental ethics such as questions about what kinds of things have value about decision making in light of the long term intergenerational nature of environmental issues and about the role that a state s being natural should play in ethical deliberation

broad in scope this introduction to environmental ethics considers both contemporary issues and the extent of humanity s responsibility for distant future life john nolt a logician and environmental ethicist interweaves contemporary science logical analysis and ethical theory into the story of the expansion of ethics beyond the human species and into the far future informed by contemporary environmental science the book deduces concrete policy recommendations from carefully justified ethical principles and ends with speculations concerning the deepest problems of environmental ethics pedagogical features include chapter outlines annotated suggestions for further readings the explanations of key terms when first mentioned and an extensive glossary

environmental ethics and behavioural change takes a practical approach to environmental ethics with a focus on its transformative potential for students professionals policy makers activists and concerned citizens proposed solutions to issues such as climate change resource depletion and accelerating extinctions have included technological fixes national and international regulation and social marketing this volume examines the ethical features of a range of communication strategies and technological political and economic methods for promoting ecologically responsible practice in the face of these crises the central concern of the book is environmental behaviour change inspiring informing and catalysing reflective change in the reader and in their ability to influence others by making clear the forms of environmental ethics that exist and what each implies in terms of

individual and social change the reader will be better able to formulate commit to articulate and promote a coherent position on how to understand and engage with environmental issues this is an essential companion to environmental ethics and philosophy courses as well as a great resource for professionals interested in practical approaches to environmental ethics it is also excellent supplementary reading for environmental studies environmental politics and sustainable consumption courses

introduces environmental ethics exploring the values involved in issues such as pollution habitat loss and climate change and considering the different groups involved including the attitudes of the world's religions to environmental stewardship
